Scorpion Truck Bed Linings:

My name is William Edwards. I have been the Service Director for the past 13 years at Santa Paula Chevrolet.

I attended the Western Region Service & Parts Summit in November of 2005. I visited your booth & met Kerman Goss. After reviewing multiple spray-on liners, including Rhino Liner, Linex & Scorpion, the decision was very easy. The price for the complete start up package was 60% less than other spray company's packages. Your product warranty is second to none. The color coded ability that is available with Scorpion is unique. Also, the polyurethane coating is industrial strength and has very little isocyanate-cyclohexane in the product.

Now for the best part about being a Scorpion dealer, Y.T.D. we have made \$38,675 on Scorpion liner sales in just over eight (8) months. The actual application takes between 3-4 hours from start to finish. We trained two (2) current employees so we didn't have to increase staff. Kerman Goss came to our dealership and gave us extensive training and only left after our techs felt comfortable with working on their own.

Overall, we are very pleased with the support we get from Scorpion liner and their staff. We have turned an old non-used spray booth into a revitalized profit center.

Thank you Scorpion for helping us make our spray on liner business a big success.

Sincerely,

A handwritten signature in black ink that reads "W.S. Edwards".

William S. Edwards
